

Unit 25 9-12 Lambridge Pl, PENRITH NSW 2750  
(02) 47292838

**Southern Cross Trailers does NOT build CHEAP box trailers, so we apologise if this is what you were after.**

We only build high quality trailers that are built to last. Please take the time to read the information that outlines what SCT does to ensure you receive a high quality product.

If you require a custom trailer please send an email enquiry to

[Info@southern-cross-trailers.com.au](mailto:Info@southern-cross-trailers.com.au)

or phone us on **(02) 47292838**

We choose to only use **Zinc Anneal** flat sheeting to provide all of this for you.

Most other manufacturers use the standard mild steel as it is cheaper and they know you will need a new trailer in a few years.

We only make commercial quality trailers using the highest quality steel and components.

Zinc-Coated steel provides the most effective way of protecting the steel from corrosion. It also provides improved paint ability. You have the option to have the floor and guards made out of zinc aswell (same cost). If not specified our standard is Checkerplate

Few basic checkpoints to ask when comparing....

- Do you use Zinc Anneal sheeting for your sides ?
- Do you only fit LED lights to ALL of your trailers?
- Do you use etch primer before painting? Are you willing to guarantee that you do?
- Do you solder your wires to avoid clips coming loose on the roads?
- Do you use RHS cross members on ALL trailers, angle iron or off cut steel?
- Do you have a rear gusset step as part of your standard design?
- Do you offer a swing removable tailgate on your higher sided trailers?

These are just 6 points that is standard practice at Southern Cross Trailers

## Standard Trailer Specs

Type of trailer(s):	<b>Commercial Grade Single Axle Trailers</b>
Sides:	Zinc anneal
GVM:	750kg Unbraked (built with 1 tonne chassis)
Floor:	2.1mm Checkerplate
Draw bar:	75x50 RHS x 1500mm
